

### KML/Shapefile Dialog Box.

#### 1. Upload KML/KMZ file

Select the 'KML/Shapefile Upload' tab to display the input options for uploading a search area (Figure 1). Select KML/KMZ option. The KML or KMZ file is limited to one record containing one polygon or line string with a maximum 30 points. Click on 'Select File'. Note: A KMZ file is a compressed (zipped) version of a KML file.

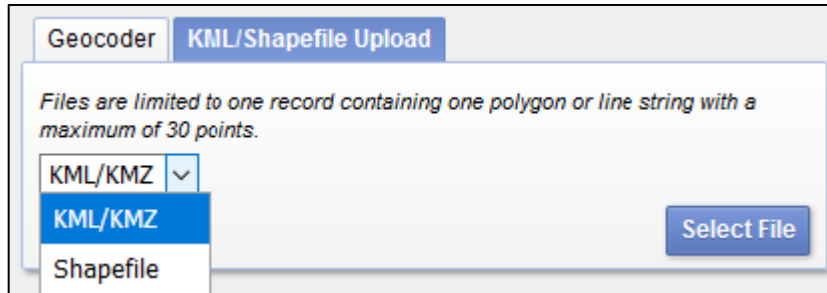

Figure 1 - Upload KML/KMZ file

Browse to the desired KML or KMZ file, select the desired file, and then select 'Open' to upload the KML/KMZ file.

#### 2. Upload ESRI Shapefile

Select the 'KML/Shapefile' tab to display the input form for uploading ESRI Shapefile information for a search area (Figure 2). Select the Shapefile option. Shapefiles are limited to one record containing one polygon or line string with a maximum 30 points. The shapefile dialog box allows for the upload of a zip file containing .shp, .shx, .dbf and .prj files. Click on 'Select File'.

Figure 2 - Upload ESRI Shapefile

The ESRI Shapefile requires all of the following files: .shp, .shx, .dbf and .prj.
