Shapefile & KMZ Dialog Box.

1. Upload ESRI Shapefile

Select the 'Shapefile' tab to display the input form for uploading ESRI Shapefile information for a search area (Figure 1). Shapefiles are limited to one record containing one polygon or line string with a maximum 30 points. The shapefile dialog box allows for the upload of a zip file containing .shp, .shx, .dbf and .prj files. Click on 'Select Shapefile'.

Figure 1 - Upload ESRI Shapefile

The ESRI Shapefile requires all of the following files: .shp, .shx, .dbf and .prj.

2. Upload KML/KMZ file

Select the 'KML' tab to display the input form for uploading a KML or KMZ file for a search area (Figure 2). The KML or KMZ file is limited to one record containing one polygon or line string with a maximum 30 points. Click on 'Select File'. Note: A KMZ file is a compressed (zipped) version of a KML file.

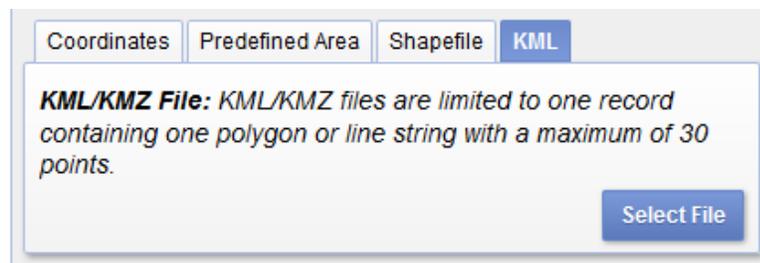

Figure 2 - Upload KML/KMZ file

Browse to the desired KML or KMZ file, select the desired file, and then select 'Open' to upload the KML/KMZ file.
